OM AUTOMATION

Product Catalogue

Collection Of Our Best Automation Products 2022/23

Introduction

We are the leading providers of automated solutions as per the demands of our clients in Gujarat .

Our products are easy to operate and tested for the highest safety standards. Creating energy efficient products is another quality of our company.

Our products can be used into various commercial and residential sectors .

Automatic Gates

Automatic Sliding Gate
Automatic Swing Gate
Automatic Curved Gate
Automatic Folding Gate
Teliscopic Gate

Autonmtic Doors

Automatic Door
Garage Doors
Fire Rated Shutters
High Speed Doors
Smart Roof

Safety Barriers

Automatic Boom Barrier
Fence Barrier
Folding Boom Barrier
Swing Barriers
Flap Barriers

Accessories

Telescopic Gate Kit
Sliding Gate Wheel
Folding Gate Wheel
Teflon Roller
Swing Gate Hinges

SG-01
Sliding Gate Series

Automatic Sliding Gate

The automations of Om Automation for the sliding gates have been designed in Various different versions. Amazing for its beautyful design and efficient for each size of the different type of gates, they are able to cover a range of gates starting from 400 kg to more than 2200 kg of weight. All models are available with mechanic and magnetic limit switch with Brushless Technology .

Our Motorized sliding gates (conventional) are gates which use a ground mounted track for the gate wheels to move on.Tracked sliding gates can have larger opening widths. A pedestrian gate can be combined with these type of gates or a separate pedestrian gate can be built. Company can produce motorized sliding gates as per client's requirements.

SLIDING GATE SERIES

Automatic Curved Gate

Sectional Sliding gates are something else again, if you have no space for telescopic or folding gates, we can slide it round the corner and up the side, basically like a sideways filding sliiding gate. this particular example has track on the bottom and a guide on top.

Automatic Telescopic Gate

Telescopic sliding gate system is the perfect solution for extra wide opening areas & where in there is very less or no run-back for single side sliding arrangement to install the conventional sliding gates.They are manufactured in two, three or more gate panels and therefore reduce the required back run/parking space.

Automatic Swing Gate Series

Modern Swing Gate

The automations of Om Automation for the swing gates have been designed in nine different versions, automations for swing, automations for swing with articulated arms e automations for undergroud swing gates with the relative foundation boxes. All versions have been developed with a modern and strong design and low impact for the aesthetics of the gate .

Automatic Folding Gate

Gates have come a long way in the age of automation. Today, you can find a gate that fits just about any need that your business or property has. If your property is limited in space, traditional gates with a large swinging radius just won't do. Luckily, there are folding gates available for just such an occasion.

Automatic Sliding Glass Door

Mostly popular amongst commercial buildings/shopping complexes, offices, corporate houses and internal door between two doorways in any industry.The excelled feature of a glass sliding door is not restricted to the vision facility that it provides but has a higher aesthetic value. They are mostly used for small span openings as entrance doors of companies and administrative departments. The transparency that they provide makes the quality inner interiors of the hall easily visible to the outsiders making them keen and interested during their visits. Glass sliding doors have turned out to be a status symbol for the corporate offices .

Functions

Dc Motor
Access Control
Rfid Card
Over Heat Protection

Automatic Swing Door

for Residential & moderate Commercial use

We Supplying a precision range of automatic swing Door in different compact designs, tolerances and are extremely easy to install. These are specifically designed to suit all architectural designs and are provided with self-locking electromechanical operator.Ideally our all automatic swing Door are Affordable and easy to install you can also adjust speed of the door .

Open and close the door by remote/ PIR/Access card etc.

Swing Door Motor

Features

Many can be integrated with access control systems (RFID, biometric, etc.).

Can be paired with upto 100 remote to operate the swing gate operator

Safely 12volts DC motors eliminate the dangers of electric shock hazard.

Overload sensors provide instant stop upon contact with obstacles.

Can work on reverse / UPS of your existing home

Remote control sender and receiver code encryption technology.

Soft start and stop.

The Swing arms are installed above the door, eliminating common

Overhead Garage Door

for Residential USe

High Speed Doors

The **Om Automation** High Speed Roll Up Doors are designed for safe, quick, efficient, and easy operation in any internal busy doorway. The door curtain rolls up at breakneck speed on the shaft, which is directly connected to the high-performance drives .

Our range of High Speed Rapid Roll Up Doors is designed for safe, fast, efficient and simple operation for any internal busy doorways. The door curtain rolls up at a very high speed on the shaft which in turn is directly connected to the high performance drives .

RAPID ROLL UP DOORS

ANTI CRASH DOORS

If a vehicle accidentallydrives over a bottom rail it disengages itself by means of mechanical devices. The next time the high-speed door opens the curtain feeds itself into the side channels and is ready for operation again .

We offer automatic crash detection as an option. The high-speed door detects the crash automatically and moves slowly upwards before feeding itself automatically back into the side channels again.

CLEAN ROOM DOORS

The ISO standard 14644-1 defines a clean-room as: “a room in which the concentration of air-borne particles is controlled, and which is construct-ed and used in a manner to minimise the introduc-tion, generation, and retention of particles inside the room and in which other relevant parameters, e.g. temperature, humidity, and pressure, are controlled as necessary ”.

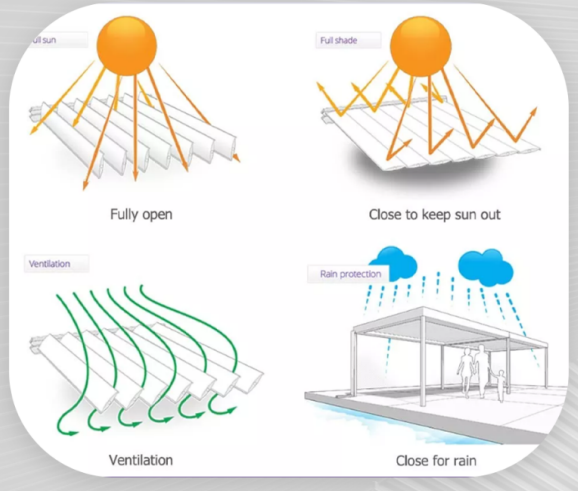

Automatic Louvered Roof

The all-new openable roofing system Om Automation – Automatic Louvered Roof or Smart roof is made up of a series of heavy-duty extruded Aluminum louvres. Simply by regulating the movement of the louvres to an angle that allows you control over more sunlight or less, more wind or less, or even to make it rainproof, you can pick whether you want more of the outside or more of the interior with a simple flick of the switch .

How It Works

The OM AUTOMATION louvred roof or Smart Roof is a clever system that converts a solid waterproof roof into a Pergola-style roof with light, ventilation, and a view of the sky above."

Security Barriers

Our Boom Barriers serves the purpose of allowing individual passage of vehicles and regulating the entry and exit of vehicles .

Boom Barrier

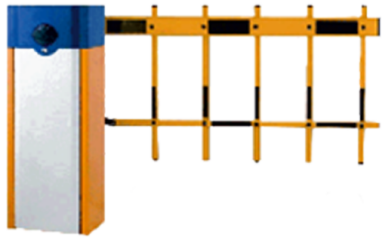

Suitable for indoor as well as outdoor parking area at airport, shopping mall, wearhouse hotel, factories, condominium, car rental companies, etc. it can also be customised to be used together with any auto pay ticketing parking or access control system .

Folding Boom Barrier

Our Articulated boom barrier with folding arm self design and manufacture, highly integrated mechanism and control system, 100% heavy duty operation. Adopts high quality galvanized steel and powder coated. Dust proof, rain proof and rust proof design, suitable for outdoor and indoor use.

It's widely used for applications like parking lot, parking garage, office buildings, industrial parks and residential communities etc.

Fence Barrier

Our straight barrier with fence is the most efficient and effective solution for controlling public and private vehicle transit and access to rest areas, even with high traffic volumes. Also for controlling and restricting unwanted entries of animals/live stocks in secured premises.
